TORBISH DEFENCES.

Hurried Proparations Against Bulgaria.

The Daily Telegraph's Athenscorrespondent wrote recently :--In reference to a passage contained in M. Radoslavoff interview recently granted to the United Press, that Turkey is muchstronger than Europe generally believes, I am informed from an authoritative source that the Bulgarian Premier used this expression advisedly on the basis of the fol-lowing information in the possession of the Bulgarian General Staff. For some months past, and especially since. Bulgaria beyong to negotiate with the Allies, formidable defensive works have been undertaken on the Chatalja lines. At the present moment, and for some considerable time past, no fewer than 30,000 laboure s have been engaged on these works. Four porallel rulway lines have been built, disappearing platforms capable of carrying a whole armoured train have been constructed, and channels and dykes are in process of con-struction by which the water of Lake Derko will be used to flood nearly the whole area

It is the opinion of the Bulgarian General Staff that to force these lines when these defence works are fully completed, and it is expected they soon will be, and army of 600,000 men will be required, and it is calculated that nearly half this number will be placed out of action before they can be carried. There may be a not unnatural disposition on the part of the Bulgarians to magnify the difficulties they may be called upon to confront if they choose to throw in their lot with the Allies; hence the above statements may be somewhat eraggerated but that the Turks have been strongthenare employing the number of mon above quoted. I have had confirmed from quarters whose interests lie in the opposite way."

before the Chatalia lines.

SNIPERS SNIPED.

Sargeant Dewar who was the King's Prize winner at Bisley in 1914, is recovering from a sunstroke at Westminster Hospital. He relates that his regiment at the Dardanslies suffered severely from Turkish suipers from behind, who shot three men. Dewar crept down an old communication trench, and spotted a Turk, with his face, hand, and rifle smeared with soil, and his body covered with foliage. He (Dewar) waited for his chance and got him through the forebend. He stalked another Turk and got him in the beck of the head. The Toris torned a machine gun on him every time he moved, and he had to lie on his face for four hours. " It was the sun that bowled me over." headded.

A terrible pictorial indicament of the atrocities committed by German soldiers is contained in the report of the Extra-"ordinary Commission of Inquiry appointed by the Tsar to investigate the many acts of brutality practised by the enemy. In the report brief accounts of each case "are given, illustrated by portraits of the victims and the mutilations they have undergane. It is an appalling record, suys the "Daily Telegraph." Russian soldiers have had their cars clipped with scissors and their tongues mutilated. their noses cut about and scarified. Fixplosive bullets have shattered their limbs and caused ghastly wounds, and poisoncome gas has Incerated their lungs. In the village of Khilichki was found the 8.50 p.m. and 8 p.m. 9.20 p.m. to 11.00 charred body of a rifeman who had been burnt slive by the Germans. The report tells a tale of anyagery and atrocity that nothing can controvert.

WAR OREED OF GERMANY:

THE KAISER'S READING OF THE APOCALYPSE.

His. "Mission."

Many have enterprised and taken in hand to set forth a rational hypothesis which will account for the payenclegy of modern Germany. I A somewhat close study of Germany and Germans since 1903, both in Germany itself, in the Near East, and further affold, has led me to the

spring of modern German thought rises in the German Emperora religio-political head & Co. a to the Dairy Farm; was subdoctrine of his imperial person, and that mitted and it was decided to get two estimates ghastly principles revealed by the mates, one for a road similar to the existing German side of the war flow of necessity road in front of Victoria Hut-I and one for from this doctrine

This is the significance of "the Day the great and terrible day of the Lord. We have good evidence that for many years the German Emperor has dabbled in estrology, and it is demonstrable, that astrology and apocalyptic are close y related.

The title, "All-highest War Lord," has its roots here. The "height" means that position when the favourable star is at its. conith. The king who makes war at that hour is "the blessed." HELPED BY EVIL

He shall make sudden war is It is very extraordinary that the German Emperor and his whole people should have followed these specalyptic pictures so closely, and translated their terrible imagery into more terrible fact. When the Kaiser went to war he did so with the conviction that his hour, fixed by celestial powers had struck; be believed that the nations would powder to dust, as a corpse long confined crumbles at the truck of air; he believed that world-domination would come to him within a small span of time, and that this super commution had been planned at the

fountain head of eternity... Now when there ideas first began to grip modern Germany they were so pulsuant that they rapidly laid hold of every departmentrof life and thought. They established the cult of the "interim." and affected the heart of Germany with a most unmatural pulsation. Mush-room philosophies sprang un as it were in a night. War became a divine duty, and all past wars were viewed. as morely preliminary steps to the last great Germanic war which was to conquer is no, our Allies and we are fighting and the world.

LATEST DETAILS FROM THE WEST FRONT

LONDON, Sept. 30. A Paris telegram announces that further progress has been made. A communique states that the German counter attack in Artois merely consisted of a most violent bombardment of the new French positions to the East of Souchez.

We gained a footing in Champagne at several points of the German's second defensive positions. Indeed, near Navarrin, certain French units went bayond the German second positions, when they were met by a curtain of fire and the most violent of flanking bombardments. Nevertheless, they held firmly the enemy's second line position.

ENEMY BOMBARDMENTS.

London, Sept. 30. The enemy violently bombarded the French positions along the Aisne, inthe Vially region. The French guns replied onergetically. Progress has been made in clearing the battlefield and taking stock of the arms and every kind of park and trench material which the enemy abandoned.

ESTIMATED CAPTURES.

An unofficial Paris estimate of the captures of Germans is put at over 350 cofficers and 25,000 men.

M. POINCARE CONGRATULATES THE ARMY.

LONDON, Sept. 30. M. Poincare, in a message to the Army, congratulates the men on their incomparable ardour and sublime devotion, which had definitely affirmed their superiority over the enemy.

GENERALS DISMISSED

London, Sept. 30. An Amsterdam telegram states that the German newspapers says, that two Generals have been dismissed owing to the Franco-British successes and the hope is expressed that General von Hindenberg will be ment to the Western Front

THE KAISER DISTRIBUTING CROSSES.

A statement in the Northbestsche, says an Amsterdam telegram, shows that the Kaiser is now on the Western Front for it says that on the 24th, accompanied by the Crown Prince, he distributed Crosses to the men who had book exposed to especially severe artillery fire.

ON THE EASTERN FRONT.

FIERCE ENEMY ONSLAUGHTS.

Lozdon, Sept. 30. A Petrograd communique states that German attacks near Friedrich. stadt and Dvinsk were repulsed, but the Russians gave way somewhat south-east of Osmiana, and east of Vilna, while south of Pripet repeated German attacks, strongly reinforced, compelled the Russians to withdray to the right bank of the Styr. Three enemy attacks at Novoalexinetzfailed. There was a desperate engagement on the Styr west of Tarnopol, where the Russians, supported by powerful artillery, captured two lines of trenches.

GUERILLA BANDS OF PEASANTS.

Lendon, Sept. 30. The Morning Post correspondent at Petrograd states that guerille the ports of the Land of the Midnight Sun, is that we could have the lack and chance bands are appearing in the rear of the Germans, consisting of persants whose homesteads have been burned, led by Cossacks. FORTHER DETAILS OF THE BIG BATTLE.

BRILLIANT WORK BY THE ANGLEFRENCH FORCES.

LONDON, Sept. 30. Benter's correspondent at Headquarters, writing on the 20th inst. states. that the first glorious charge of the British from the Vermelles trenches on Saturday morning carried them right through the villege of Loss to the summit of and beyond Rill 70. The men left the trenches at 6,30 when the sun had risen sufficiently to make the enemy's parapet clearly visible. Officers stood with watches in their hands impatiently waiting for the minute when the batteries in the cear would lengthen their range, and the men with bayonets fixed and landers ready to swarm up the parapets lengthwise. A whistle was sounded, and the troops rushed off in an irresistible manner. They carried the enemy's first and second lines within an hour, and or eight the whole unit in question was streaming through the streets of Loos.

THE DASH THROUGH LOOS.

The Colonel of one Regiment followed his men over the parapet, and when he reached the first of the enemy's Menches was astonished to find no trace of the attacking companies. The Colonel crossed the trench, and entered the second line, where he caught eight of his men dushing through Loos village. itself, which was protected by a triple line of wire of extraordinary thickness and strength the barbes being nearly an inch long. The first two bines were destroyed by the artillery, but the third stood still and had to be cut by the men standing up fully exposed to fire. The German dead were piled four deep in some of the trenches. In the village bayonet and bomb work was in full swing in the winding streets. Many of the callars contained Germans, and our bombers, dashing into the houses, pulled up the flags of the cellars and dropped their bombs. Hidden machine-guns were discovered in several places and had to be routed out.

A BRAYE GERMAN OFFICER.

The Commander of one battalion was sheltered with signallers in a solidly built house from the German shells, but was soon surprised by a min of projectiles. It was found after a search that there were two super-imposed dugouts in the vicinity, and in the nethermost was a German officer with a telephone, busily directing a battery miles in the rear. Despite the British occupation be had bravely remained at his post, and learning that an officer of importance was in the vicinity he ordered the house to be shelled. Hundreds of dead and wounded were found lying among the debris of the houses, and the church was a mere shapeless mass of bricks. Everywhere there were fortified machine-gun emplacements, especially in the cemetery, and field-guns were found in cemented entranchments. A few of the French inhabitants were still slive, they being mostly women.

THE LAST RUSH.

The last rush of the attackers carried the summit of Hill 70, and half a mile east of the village. Some went beyond till checked by a powerful earthwork defence. The enemies batteries are now concentrating on the Hill, and the attackers have been ordered to entrench a hundred yards from the summit. Fierce fighting continued all round the Hill on Sunday and Monday.

The New Army Battalions were conspicuous in the attack. Men who were inexperienced in real lighting advanced in a most steady manner under a terrible are. They hanled the German forts firing from cellars, charged and captured machine-guns tiring through the holes of cottage walls, all amid a terrifying din, while the nir overhead was thick with bursting shrapuel.

HAND-TO-HAND FIGHTING.

Tempestuous weather is rendering the operations most difficult. The Crown Prince's attack was as forious as any in the war. The French parapets were melted away by the forious bombardment. Then began gushes of liquid fire, but the French stood firm and poured sheets of lead at the advancing Germans. Then there was bloody hand-to-hand fighting. The Frenchmen were almost buried in masses of Germans, but the reserves: not heeding the gas sheets, made the enemy waver. Eventually the Germans returned to their own trenches, and were prevented from bringing up supports by the French guns.

ALL NEW POSITIONS MAINTAINED.

LONDON, Sept. 30. A French communique states that fighting has continued all day on the heights between Southez and Vinny. We have maintained all the new captured positions. There is still violent fighting in Champagne before the enemy's rear

With the object of reducing the salient in north Mesnil, where German fractions are still holding ground, we progressed on the slopes of Tahure Knoll and the outskirts of the village, and also north of Massiges.

GERMAN LOSSES EXCEED THREE ARMY CORPS.

The introduction to another communique says: - "The Germans have not been forced to abondon along an extended front positions strongly entrenched and which they had orders to resist to the end, but the sustained losses exceed the strength of three Army Corps."

There have already passed through Chalons 17,055 prisoners including 316

LONDON, Sept. 30.

In the House of Commons, Mr. Bount Law, replying to criticisms of the import duties said that they had not been suggested by any Tariff. Reform Ministers, and he believed that they would have been imposed with equal certainsy if there were no Unionists in the Cabinet, Indeed, from a Tariff Reform point of view, they were Tel.

INDIA AND THE IMPERIAL CONFERENCE.

in form contrary to all the principles

laid down in the past. Their sole

motive was to enforce economy.

LONDON, Sept. 30.

Mr. Chemberlain, Under Secretary of State for India, replying in the House of Commons to a question put by Sir John Rees, said no decision had yet been taken on the very important subject of the representation of Indian as the next Imperial Conference, nor can a decision be taken without consultation with the Dominions. But the Vicercy had been authorised to inform the Council that its resolution would receive the most careful consideration of the Government, When the full account of the debatain the Council is available it will no doubt be read with equal interest and sympathy in all parts of His Majesty's Dominions but the constitution, which is at present fixed by a resolution of the Conference itself. can only be altered with the consent of the Governments represented.

THE ANGLO-FRENCH LOAN IN AMERICA.

LONDON, Sept. 30.

The Angle-French loan syndicate. will be the largest of its kind ever formed in the United States, the membership including Banks, Trust Com papies, and individual financiers from the Atlantic to the Pacific Forty banks in New York alone have signified their intention of joining. The popular character of the support given to the Allies is compared to the reception given to the German loan, which the German bankers, despite frantic appeals to the German-American investory bave been compelled to offer under conditions yielding practically nine percent. Mr. Pierpont Morgan's representative has announced that the response to the loan in all parts of the country has been exceedingly gratifying, and promises to be enthusiastic. Any opposition has
